13. Deleting a Draft

14. Logging Out

15. Quick Reference

1. Introduction

The PCR application is where VCRT responders fill out and submit **Patient Care Reports** (PCRs) after a call. Every report you submit is reviewed by an administrator (usually the Executive Coordinator) who either approves it or sends it back to you with comments if something needs to be fixed.

This guide walks through every screen and every field in the application, in the order you'll actually use them: logging in, filling out a report, saving your work, submitting, and handling a report that gets sent back for changes.

NOTE *Screenshots in this guide were taken from a test copy of the application, so the names, dates, and report numbers you see won't match your real reports. The layout and behavior are the same.*

2. Logging In

Open the PCR application. You'll land on the login screen.

1. Type your username into the **Username** field.
2. Type your password into the **Password** field. Click the eye icon inside the field if you want to check what you typed before submitting.
3. Click **Sign In**.

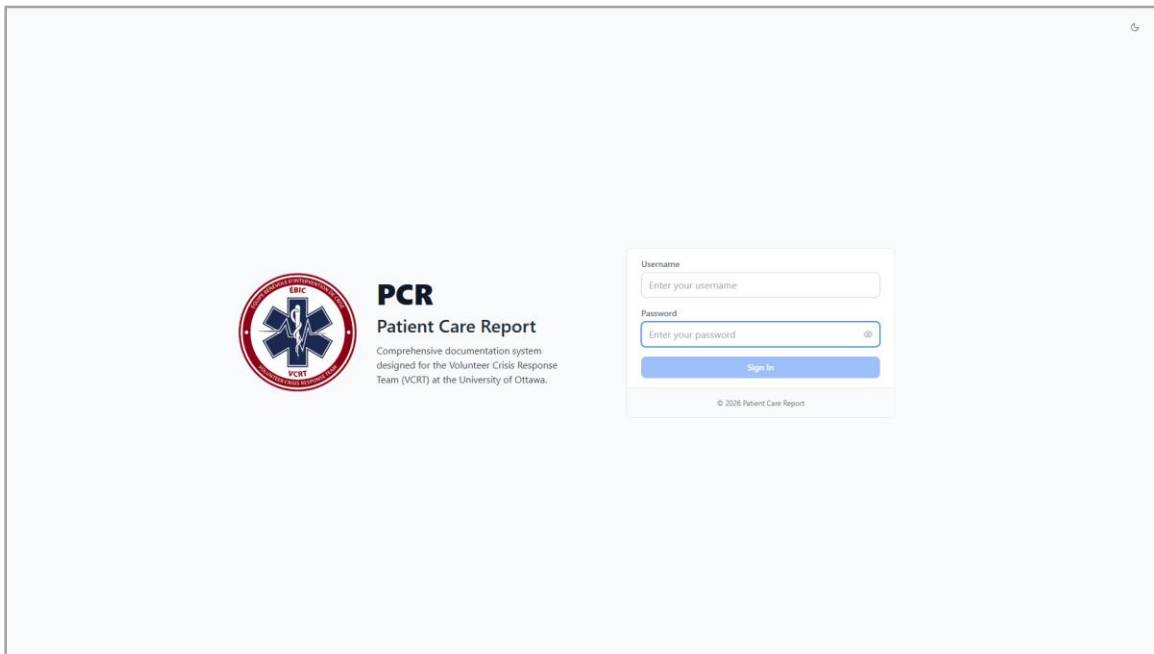

Figure 1. The login screen.

If your username or password is wrong, the form will show an error message and let you try again for up to 3 times before a 10-minute cooldown. If you've forgotten your password, an administrator can reset it for you.

NOTE After a period of inactivity you'll be signed out automatically and returned to this screen. This is a security measure, not a bug.

3. The Dashboard

Once you're signed in, you land on the **Dashboard**. This is your home screen and shows a quick summary of your own activity, plus a few reference tools.

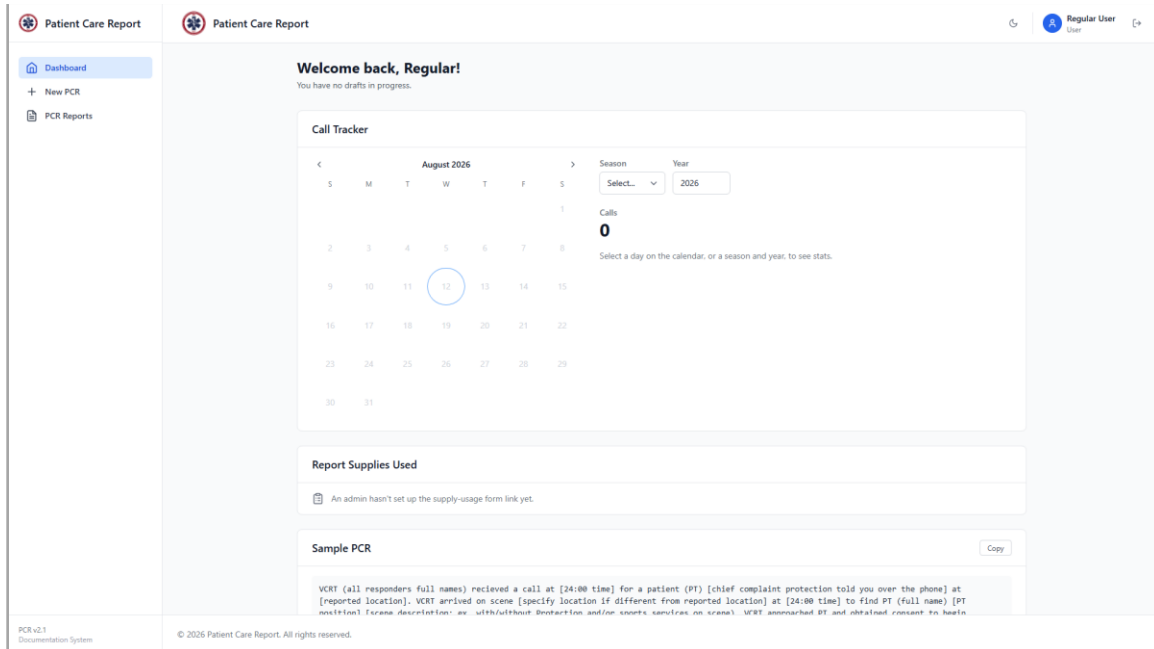

Figure 2. The Dashboard, top of page: welcome message, drafts in progress, and the Call Tracker.

- **Drafts in Progress:** if you have any saved drafts, they're listed here with a shortcut straight back into the form. This card only appears when you have at least one draft.
- **Call Tracker:** a calendar showing which days you responded to a call. Select a season and year, or click a specific day, to see your call count and which responders were on these calls.

Scrolling down the Dashboard shows a few more sections:

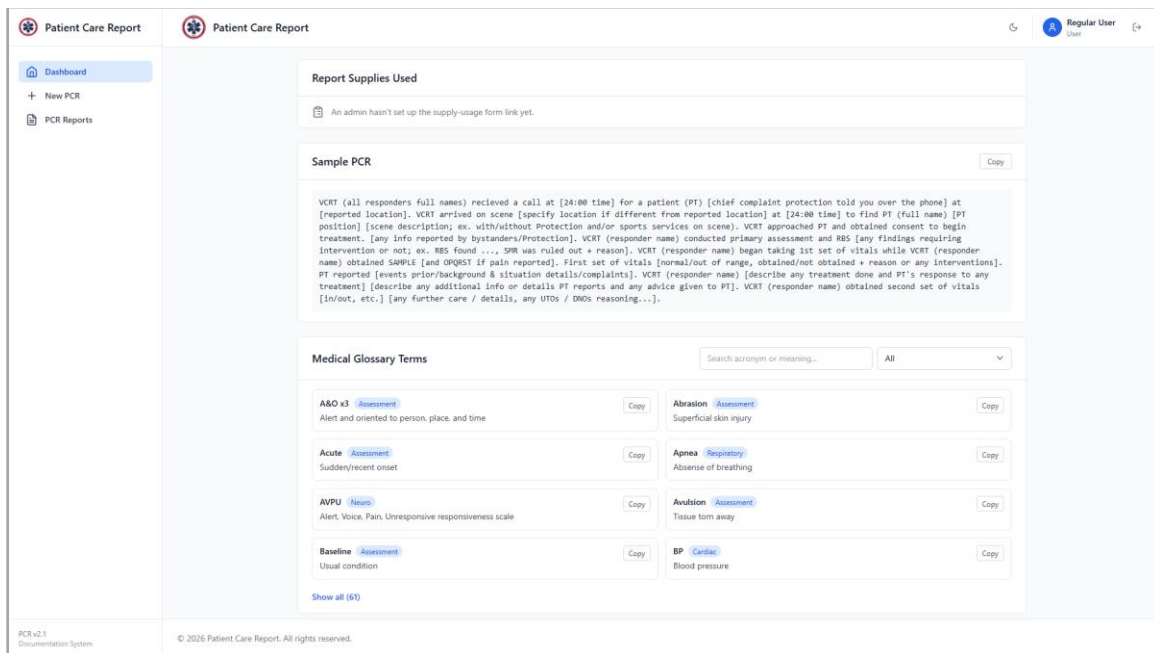

Figure 3. The Dashboard, further down: supply reporting, sample PCR, and reference material.

- **Report Supplies Used:** a QR code to the supply-usage form, if an admin has set one up. This form is used to report all supplies used throughout your call. If you see "An admin hasn't set up the supply-usage form link yet," nothing is broken — it just hasn't been configured yet.
- **Sample PCR:** an example of a well-written call description, for reference when you're writing your own. Click Copy to copy the text.
- **Medical Glossary and Debrief Questions:** further down the page, these are reference material — common medical abbreviations and a set of standard debrief questions for the supervisor to refer to after a call.

The sidebar on the left is how you navigate the rest of the application: **Dashboard**, **New PCR**, and **PCR Reports**.

4. Report Statuses

Every PCR you create moves through a series of states. Understanding these up front makes the rest of the application much easier to follow.

Status	What it means for you
Draft	Saved but not submitted. Only you can see it, and you can edit or delete it freely.
Submitted	Sent to the admin for review. You can no longer edit or delete it, but you can still view the PDF.
Changes Requested	The admin reviewed it and asked you to fix something. You can edit it again and resubmit it, but you can't delete it yourself.
Approved	The admin signed off on it. The report is now final — see the note below. (This still applies if it's later marked Completed by the admin, you won't see any difference.)
Cancelled	The admin decided it wasn't needed after all, before approving it. You can still view the PDF, but nothing else (it's automatically removed about a week later, and it never counts toward your Call Tracker totals).

NOTE Once a report is **Approved**, it no longer appears anywhere in your PCR Reports list (this remains true if an admin later marks it **Completed**, too). This is intentional: approved reports are finalized records, and editing or viewing access moves to the administrators who maintain them. If you need a copy of an approved report, contact an admin. A **Cancelled** report is different, it stays visible to you (view-only) until it's automatically removed about a week after cancellation.

5. Starting a New PCR

1. Click **New PCR** in the left sidebar.

You'll get a blank form. It's long, so the rest of this guide walks through it one section at a time, in the order they appear on the page.

The screenshot displays the 'Patient Care Report' form. On the left is a sidebar with 'Dashboard', '+ New PCR' (highlighted), and 'PCR Reports'. The main area is titled 'Patient Care Report' with a subtitle 'Complete fields to submit the report' and a 'Fill Sample Data' button. The 'Basic Information *' section is expanded, showing fields for Date (2026-08-12), Location (Incident location), Call Number (Call #), Report Number (Report #), Supervisor (Supervisor name), Primary PSM (Primary PSM name), Responder 1 (Search responders...), Time Notified (HH:MM (24hr)), On Scene (HH:MM (24hr)), Transport Arrived (HH:MM (24hr)), Cleared Scene (HH:MM (24hr)), Paramedics Called by (Who called paramedics), and First Agency on Scene (First responding agency). The 'Patient Information *' section is partially visible below, with fields for Patient Name (Full name), Date of Birth (yyyy-mm-dd), Age (Age in years), and Sex (Male).

Figure 4. The top of a blank PCR form: Basic Information.

NOTE The *Fill Sample Data* button in the top-right corner fills the entire form with placeholder text. It exists for testing and demonstrations — **don't use** it on a real report.

6. Filling Out the Form

Fields marked with a red asterisk (*) next to the section title, or shown with "DNO or UTO if not obtained" in the subtitle, are required before you can submit. "DNO" means **Did Not Obtain** and "UTO" means **Unable To Obtain**. Use one of these instead of leaving a required field blank if you genuinely couldn't get that information on scene and justify the reason in the comments section.

Basic Information

Required. Essential details about the call itself.

The screenshot shows the 'Patient Care Report' form in a web application. The left sidebar contains a 'Dashboard' link and a 'New PCR' button. The main form area is titled 'Patient Care Report' and contains the following fields:

- Report Number:** A text field labeled 'Report #'.
- Supervisor:** A text field labeled 'Supervisor name' with a dropdown arrow.
- Primary PSM:** A text field labeled 'Primary PSM name'.
- Responder 1:** A search bar labeled 'Search responders...' with a trash icon and an 'Add Responder' button.
- Time Notified:** A time picker labeled 'HH:MM (24hr)'.
- On Scene:** A time picker labeled 'HH:MM (24hr)'.
- Transport Arrived:** A time picker labeled 'HH:MM (24hr)'.
- Cleared Scene:** A time picker labeled 'HH:MM (24hr)'.
- Paramedics Called by:** A text field labeled 'Who called paramedics'.
- First Agency on Scene:** A text field labeled 'First responding agency'.
- Patient Information *:** A section header with the subtitle 'Patient information and contact details (DNO or UTO if not obtained)'. It contains:
 - Patient Name:** A text field labeled 'Full name'.
 - Date of Birth:** A date picker labeled 'yyyy-mm-dd'.
 - Age:** A text field labeled 'Age in years'.
 - Sex:** Radio buttons for 'Male', 'Female', 'Different from gender', 'Does not want to disclose', and 'Other'.
 - Status:** Radio buttons for 'Student' and 'Employee'.

The footer of the form displays 'PCR v2.1 Documentation System' and '© 2026 Patient Care Report. All rights reserved.'

Figure 5. The Basic Information section.

- **Date:** defaults to today; change it if you're filing the report after the fact (e.g., call right before midnight).
- **Location:** where the call took place.
- **Call Number:** the internal call number for this response.
- **Report Number:** this report's unique reference number.
- **Supervisor:** the supervisor on duty for this call.
- **Primary PSM:** the primary PSM's name for this call.
- **Responders Involved:** search and select each responder present, in addition to the Supervisor above. Click **Add Responder** for another, up to 4 in total, or the trash icon next to a name to remove it. This searches the admin-managed responder list which should include all active members, but you can also type a name that isn't on it.
- **Time Notified, On Scene, Transport Arrived, Cleared Scene:** enter times in 24-hour HH:MM format (e.g., 19:42).
- **Paramedics Called By:** who called paramedics, if applicable.
- **First Agency on Scene:** which agency arrived first.

Patient Information

Required. Use **DNO** or **UTO** for anything you genuinely couldn't obtain.

Patient Information *
Patient information and contact details (DNO or UTO if not obtained)

Patient Name: Full name
Date of Birth: mm/dd/yyyy
Age: Age in years

Sex:
☐ Male
☐ Female
☐ Different from gender
☐ Does not want to disclose
☐ Other

Status:
☐ Student
☐ Employee
☐ Visitor/Other

Workplace Injury?:
☐ Yes ☐ No

Student/Employer Number:
ID number

Emergency Contact Name (and Relationship):
Contact person name and relationship

Emergency Contact Phone:
(XXX) XXX-XXXX

Contacted?:
☐ Yes ☐ No

Patient Medical History
Medical background and assessment findings (DNO or UTO if not obtained)

Chief Complaint: _____
Signs and Symptoms: _____

PCR v2.1
Documentation System

© 2026 Patient Care Report. All rights reserved.

Figure 6. The Patient Information section.

- **Patient Name**
- **Date of Birth or Age:** at least one of the two is required.
- **Sex:** Male, Female, Different from gender, Does not want to disclose, or Other.
- **Status:** Student, Employee, or Visitor/Other. If you pick Visitor/Other, a field appears to specify further.
- **Workplace Injury?:** Yes or No.
- **Student/Employer Number**
- **Emergency Contact Name (and Relationship), Emergency Contact Phone**
- **Contacted?:** Yes or No. If Yes, a **Contacted By** field appears for who made the call.

Patient Medical History

Treat every field here as DNO/UTO if you didn't obtain it. An admin reviewing the report will expect an answer either way.

The screenshot shows the 'Patient Medical History' section of the PCR Application. The interface includes a sidebar with 'Dashboard', 'New PCR', and 'PCR Reports'. The main content area is titled 'Patient Medical History' and contains the following sections:

- Chief Complaint:** A text box for 'Primary reason for call as reported by dispatch'.
- Signs and Symptoms:** A text box for 'Observable signs and reported symptoms...'.
- Allergies:** A text box for 'Known allergies (food, medicine...), sensitivities, and reactions...'.
- Medications:** A text box for 'Current medications (name, dose, reason, taken as prescribed)'.
- Pertinent Medical History:** A text box for 'Relevant medical history and conditions...'.
- Last Oral Intake:** A text box for 'When and what was last consumed (food, drink...), and whether it sat well...'.
- Rapid Body Survey Findings:** A text box for 'Physical examination findings...'.
- Treatment Performed:** A section for 'Lifesaving interventions and care provided to the patient' with checkboxes for:
 - ☐ Airway Management
 - ☐ Hemorrhage Control
 - ☐ Immobilization
 - ☐ CPR/AED
- Position of Patient:** A text box for 'Position of Patient'.

At the bottom left, it says 'PCR v2.1 Documentation System'. At the bottom center, it says '© 2026 Patient Care Report. All rights reserved.'.

Figure 7. The Patient Medical History section.

- **Chief Complaint:** the primary reason for the call, as reported.
- **Signs and Symptoms:** what you observed and what the patient reported.
- **Allergies:** known allergies, sensitivities, and reactions.
- **Medications:** current medications: name, dose, reason, and whether taken as prescribed.
- **Pertinent Medical History:** relevant conditions and history.
- **Last Oral Intake:** when and what was last consumed, and whether it sat well.
- **Rapid Body Survey Findings:** what you found on physical examination.

Treatment Performed

Check every box that applies. Some selections reveal extra fields.

Treatment Performed
Lifesaving interventions and care provided to the patient.

☐ Airway Management
☐ Hemorrhage Control
☐ Immobilization
☐ CPR/AED

Position of Patient
e.g. Seated, Supine, Prone, Semi-Prone...

OPQRST Assessment
Add a section for each reported pain/injury location; its number/color are shown on the body diagram below (DNO or UTO if not obtained).

Figure 14. The Vital Signs table.

- **Time:** HH:MM.
- **HR:** heart rate: rate, rhythm, and quality.
- **RR:** respiratory rate: rate, rhythm, and quality.
- **SpO2:** oxygen saturation, 0–100%.
- **B/P:** blood pressure, as SYS/DIA or SYS/PALP.
- **LOC, GCS:** level of consciousness (A&O x1 through x3), or a Glasgow Coma Scale score from 3 to 15.
- **Skin:** temperature, colour, and moisture.
- **Pupils:** PERRLA (Pupils Equal, Round, Reactive to Light and Accommodation) and a size in mm (if different for each eye, take note of both).

NOTE Use 24-hour time. If a value wasn't obtained, enter DNO or UTO and explain in the Call Description. Click any cell to edit it, and press Enter to save.

Oxygen Protocol

Fill this in if oxygen therapy was given or considered. It has two parts: **Oxygen Saturation Assessment** and **Oxygen Therapy Decision**.

The screenshot shows the 'Oxygen Protocol' form within the 'Patient Care Report' application. The form is divided into several sections:

- Oxygen Protocol**: Oxygen therapy administration details.
- Oxygen Saturation Assessment**:
 - Saturation Target Range**: Radio buttons for ☐ COPD (88-92%) and ☐ Other (95-100%).
 - Initial SpO₂ %**: A text input field with a placeholder 'Enter value (0-100)'.
 - Initial SpO₂ Acceptable?**: Radio buttons for ☐ Yes and ☐ No.
- Oxygen Therapy Decision**:
 - Oxygen Therapy Given?**: Radio buttons for ☐ Yes and ☐ No.
- Additional Information ***: Call details and patient transfer information.
 - Call Description**: A text input field with a placeholder 'Detailed description of the call...'.
 - Transfer of Care**: A text input field with a placeholder 'Details about patient transfer...'.
- Footer**: Labels for 'Patient Care Transferred' and 'Time Care Transferred'.

Figure 15. The Oxygen Protocol section.

- **Saturation Target Range:** COPD (88–92%) or Other (95–100%).
- **Initial SpO₂ %:** the reading before any intervention.
- **Initial SpO₂ Acceptable?:** Yes or No, given the target range you selected.
- **Oxygen Therapy Given?:** Yes or No. Selecting **Yes** reveals further fields for **Reason for O₂ Therapy**, **Delivery Device** (Nasal Cannula, Non-Rebreather Mask, or Bag Valve Mask), **Time Started**, **Time Ended**, **Initial Flow Rate (L/min)**, **Reason for Ending Therapy**, and **Who Started Therapy**.
- **Flow Rate Alterations:** appears as a field if oxygen therapy was given. If the flow rate was changed during the call, add a row for each change with the time and new rate.

Additional Information

Required. This is the narrative section of the report: how the call unfolded and how it ended.

The screenshot shows the 'Additional Information' section of a Patient Care Report form. The form is titled 'Additional Information *' and includes the subtitle 'Call details and patient transfer information'. It contains several sections: 'Call Description' with a text area for a detailed description; 'Transfer of Care' with a text area for details about patient transfer; 'Patient Care Transferred' with radio buttons for Paramedics, Police, Self, Family/Friend, and Clinic; 'Time Care Transferred' with a dropdown menu for HHMM (24hr); 'Additional Attachments' with a dashed box for dragging and dropping a PDF and a 'Browse' button; and 'Add Signatures' with a line for the Supervisor. The form is part of a larger application with a sidebar containing 'Dashboard', 'New PCR', and 'PCR Reports'.

Figure 17. The Additional Information section.

- **Call Description:** required. A detailed, chronological account of the call: who responded, what was found, what was done, and by whom. The **Sample PCR** card on the **Dashboard** is a good model for the level of detail expected here.
- **Transfer of Care:** required. To whom the patient was handed off and the patient's condition at handoff as well as any advice given to the patient prior to hand-off.
- **Patient Care Transferred:** required. Paramedics, Police, Self, Family/Friend, or Clinic. Depending on your choice, an extra field appears: Unit Number and Hospital Destination for Paramedics, Badge Number for Police, or Clinic Name for Clinic.
- **Time Care Transferred:** required. 24-hour HH:MM format.

Additional Attachments

Optional. If you have a signed patient sign-off sheet or other document as a PDF, attach it here; it will be appended to the end of the generated PDF report (usually required when care transfer was not done to paramedics or other higher level of care). The document will need to be priorly scanned and uploaded to the workstation.

The screenshot displays the 'Patient Care Report' form. The left sidebar contains navigation links: 'Dashboard', '+ New PCR', and 'PCR Reports'. The main form area is divided into sections: 'Call Description' with a text input field; 'Transfer of Care' with a text input field; 'Patient Care Transferred' with radio button options for Paramedics, Police, Self, Family/Friend, and Clinic; 'Time Care Transferred' with a time selection dropdown set to 'HH:MM (24hr)'; 'Additional Attachments' with a dashed box for file upload and a 'Browse' button; and 'Add Signatures' with a 'Supervisor' signature line. The footer includes 'PCR v2.1 Documentation System' and '© 2026 Patient Care Report. All rights reserved.'

Figure 18. The Additional Attachments upload area.

1. Drag and drop a PDF onto the box, or click Browse to pick a file.
2. The file name appears once it's attached. Click Remove to take it off again.

NOTE Only PDF files are accepted, up to 15 MB.

Add Signatures

Sign-off from everyone who responded to the call: the supervisor first, then each responder you added in Basic Information. Use the arrows on either side to move between signers.

Figure 19. The Add Signatures section, showing whose turn it is to sign and how many signers remain.

1. Sign in the box using the mouse or trackpad/touchpad.
2. Click **Clear** if you need to redo a signature.
3. Use the right arrow to move to the next signer once you're done.

7. Saving a Draft

You don't have to finish the form in one sitting (in case you get another call mid-writing). Click **Save Draft** at the bottom of the page at any point to save your progress without submitting.

As an example, here's the form after clicking Fill Sample Data to populate every field at once (this is only ever done for demonstrations, but it shows what a filled-in form looks like):

The screenshot displays the 'Patient Care Report' form in a web application. The form is titled 'Patient Care Report' and includes a 'Fill Sample Data' button. The form is divided into two main sections: 'Basic Information *' and 'Patient Information *'. The 'Basic Information *' section contains fields for Date, Location, Call Number, Report Number, Supervisor, Primary PSM, Responder 1, Responder 2, Time Notified, On Scene, Transport Arrived, Cleared Scene, Paramedics Called by, and First Agency on Scene. The 'Patient Information *' section contains fields for Patient Name, Date of Birth, and Age. The form is filled with sample data, and a notification 'Sample data filled for testing' is visible in the top right corner.

Basic Information *	
Date	2026-08-12
Location	Montpetit Hall, Gymnasium A

Figure 22. A signature drawn in the signature pad.

Clicking **Save Draft** stores exactly what you've entered so far, including any signatures and attachments, and shows a confirmation message.

The screenshot shows the 'Patient Care Report' form in a web application. The form is titled 'Patient Care Report' and has a sidebar on the left with links to 'Dashboard', 'New PCR', and 'PCR Reports'. The main content area contains several sections: a radio button group for 'Police', 'Self', 'Family/Friend', and 'Clinic'; a text field for 'Unit Number' with the value 'A-142'; a text field for 'Hospital Destination' with the value 'The Ottawa Hospital - Civic Campus'; a section for 'Additional Attachments' with a 'Browse' button; a section for 'Add Signatures' with a signature of 'Supervisor — Sarah Chen' and a 'Clear' button; and a footer with 'Reset Form', 'Save Draft', and 'Submit PCR' buttons. A green confirmation message 'Draft saved successfully' is displayed in the top right corner.

Figure 23. Confirmation after saving a draft.

NOTE Save Draft never validates required fields. You can save a mostly-empty form as a draft and come back to it later. Validation only happens when you submit.

8. Resuming a Draft

There are two ways back into a saved draft:

- From the **Dashboard**, under **Drafts in Progress**, click the draft you want.
- From **PCR Reports** in the sidebar, find the draft in the list and click **Edit**.

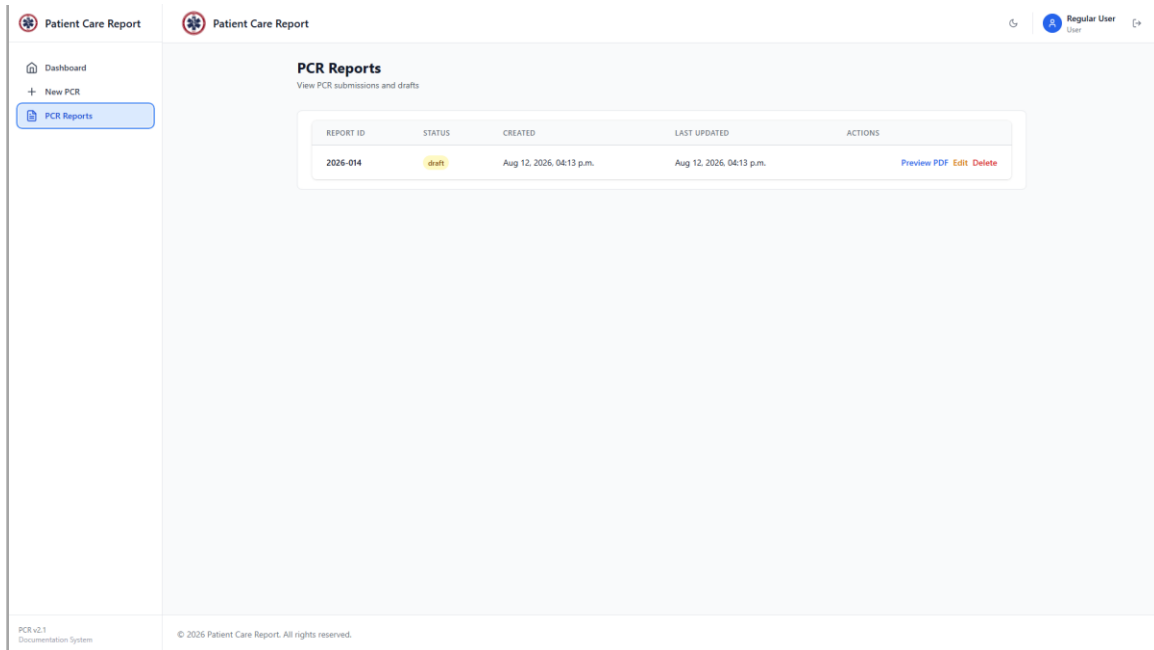

Figure 24. The PCR Reports list, showing one draft with its Preview PDF, Edit, and Delete actions.

Either way, the form reopens with everything you'd already entered, ready to continue.

The screenshot shows the 'Edit Patient Care Report Draft' form. At the top right, a green notification says 'Draft loaded successfully'. The form is divided into several sections:

- Basic Information ***: Essential call details and response information.
 - Date: 2026-08-12
 - Location: Montpetit Hall, Gymnasium A
 - Call Number: 014
 - Report Number: 2026-014
 - Supervisor: Sarah Chen
 - Primary PSM: Marc Tremblay
 - Responder 1: Daniel Osei
 - Responder 2: Priya Nair
 - Buttons: + Add Responder, x, and trash icons for responders.
- Time and Scene Details:
 - Time Notified: 19:42
 - On Scene: 19:45
 - Transport Arrived: 20:10
 - Cleared Scene: 20:20
 - Paramedics Called by: Responder 1
 - First Agency on Scene: Protection Services
- Patient Information ***: Patient information and contact details (DNO or UTO if not obtained).
 - Patient Name: Emily Tran
 - Date of Birth: yyyy-mm-dd
 - Age: 20

The footer of the application shows 'PCR v2.1 Documentation System' and '© 2026 Patient Care Report. All rights reserved.'

Figure 25. A draft reopened for editing.

NOTE *On the PCR Reports list, a draft row has three actions: **Preview PDF** (see what it would look like without submitting), **Edit** (open it in the form to keep working, or submit it from there when you're ready), and **Delete**.*

9. Submitting a Report

When the form is complete, click **Submit PCR** at the bottom of the page.

1. If any required field is missing or invalid, the application tells you which ones and jumps you to the first problem. Fix it and click **Submit PCR** again.
2. Once validation passes, a PDF of the report is generated and a confirmation window opens.

The screenshot shows the 'Patient Care Report' form with a 'Submission Confirmation' modal window open. The modal contains a 'Preview' button, a message 'Please preview the PCR report and confirm below when completed.', and 'Submit' and 'Cancel' buttons. The background form shows fields for 'Unit Number' (A-142), 'Hospital Destination' (The Ottawa Hospital - Civic Campus), and 'Additional Attachments'. There are also radio buttons for 'Police', 'Self', 'Family/Friend', and 'Clinic'. At the bottom of the form, there are buttons for 'Reset Form', 'Save Draft', and 'Submitting...'. Two success messages are visible in the top right: 'Draft loaded successfully' and 'Draft saved successfully'.

Figure 26. The submission confirmation window.

- Click **Preview** to open the generated PDF and check it over.

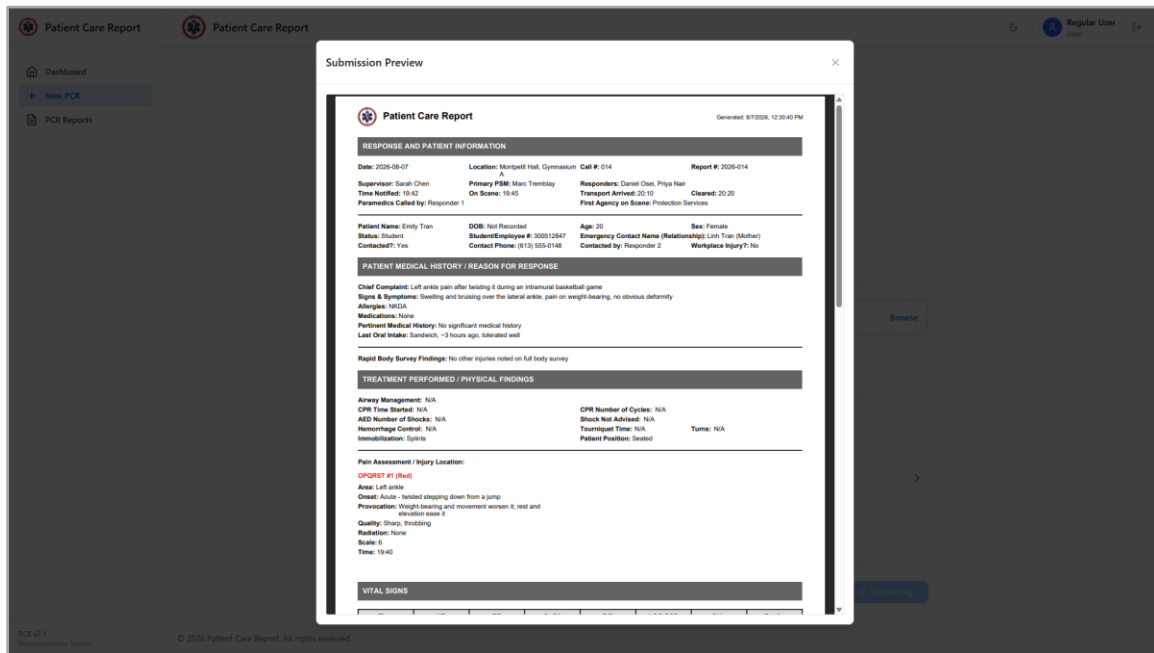

Figure 27. The generated PDF, shown in the preview window.

- Close the preview. The **Submit** button in the confirmation window is now enabled.

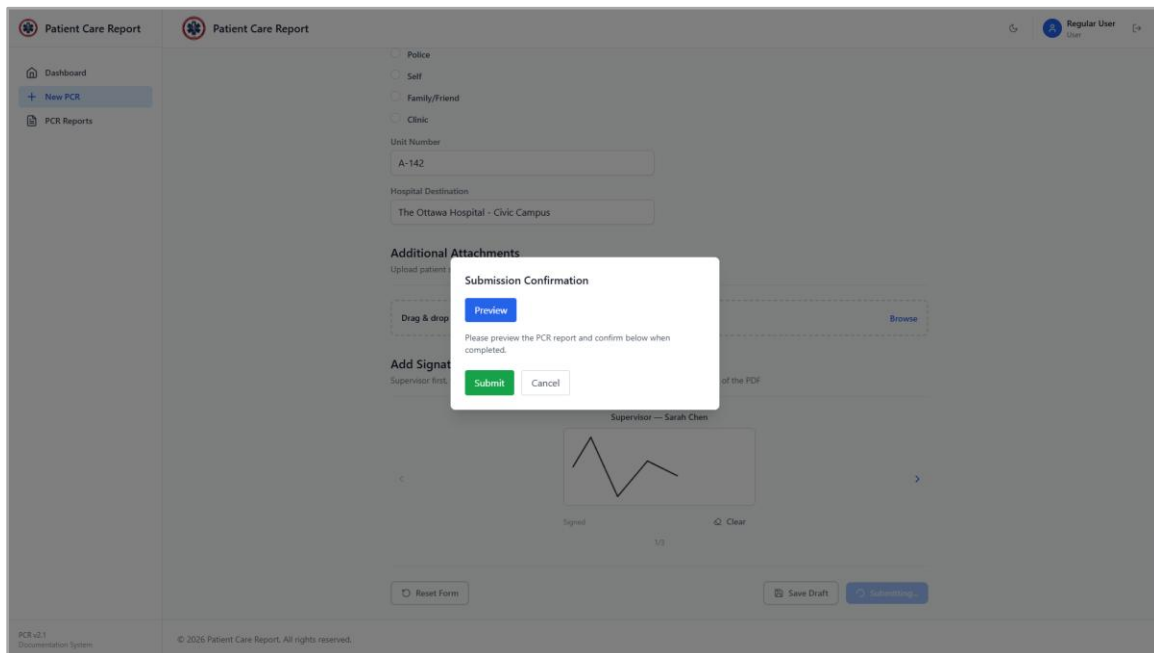

Figure 28. The confirmation window after previewing — Submit is now enabled.

5. Click **Submit** to send the report to the admin for review or **Cancel** to back out without submitting.

Draft updated and submitted successfully

Figure 29. Confirmation after a successful submission.

NOTE You must open the preview before you can submit. This is a deliberate check so you actually look over the report before it goes to review.

10. Viewing Your Reports

Click **PCR Reports** in the sidebar to see everything you've created: drafts, submitted reports, anything sent back to you for changes, and any of your reports that an admin has cancelled (view-only, until they're automatically removed).

The screenshot shows the 'Patient Care Report' application interface. On the left is a sidebar with a 'Dashboard' icon, a '+ New PCR' button, and a 'PCR Reports' button (highlighted with a blue border). The main content area is titled 'PCR Reports' with the subtitle 'View PCR submissions and drafts'. A table displays one report with the following data:

REPORT ID	STATUS	CREATED	LAST UPDATED	ACTIONS
2026-014	submitted	Aug 12, 2026, 04:13 p.m.	Aug 12, 2026, 04:13 p.m.	View PDF

A notification banner at the top right states 'Draft updated and submitted successfully'. The footer includes 'PCR v2.1 Documentation System' and '© 2026 Patient Care Report. All rights reserved.'

Figure 30. The PCR Reports list with one submitted report.

You can submit as many reports as you need to, the list simply grows as you add more.

This screenshot shows the same 'Patient Care Report' interface as Figure 30, but with two reports listed in the table. A notification banner at the top right now states 'PCR form submitted successfully'.

REPORT ID	STATUS	CREATED	LAST UPDATED	ACTIONS
2026-014	submitted	Aug 12, 2026, 04:13 p.m.	Aug 12, 2026, 04:13 p.m.	View PDF
2026-014	submitted	Aug 12, 2026, 04:13 p.m.	Aug 12, 2026, 04:13 p.m.	View PDF

The sidebar and footer remain the same as in Figure 30.

Figure 31. Two submitted reports in the list.

Click **View PDF** on any row to open the generated PDF for that report. As a regular user, you can view and print from this preview, but downloading a copy to the device is restricted to administrators.

11. What Happens After You Submit

A submitted report is reviewed by an administrator (Executive Coordinator), who does one of a few things:

- **Approves it.** The report is now final, and it drops off your PCR Reports list (see Section 4 for why).
- **Sends it back with comments, asking you to fix something.** Its status changes to **Changes Requested** and it stays in your list until you resubmit it.
- **Cancels it, if it turns out not to be needed at all.** Its status changes to **Cancelled** (you can still view the PDF, but that's the only thing left to do, and it's automatically removed about a week later).

There's no notification inside the application when this happens. Check your PCR Reports list periodically, especially after submitting a report, to see whether it's still pending, has been approved, needs changes, or was cancelled.

12. If the Admin Sends a Report Back for Changes

If a report needs correction, its status changes to **Changes Requested** and you get an **Edit & Resubmit** action, along with a **View Comments** action showing what the admin asked for.

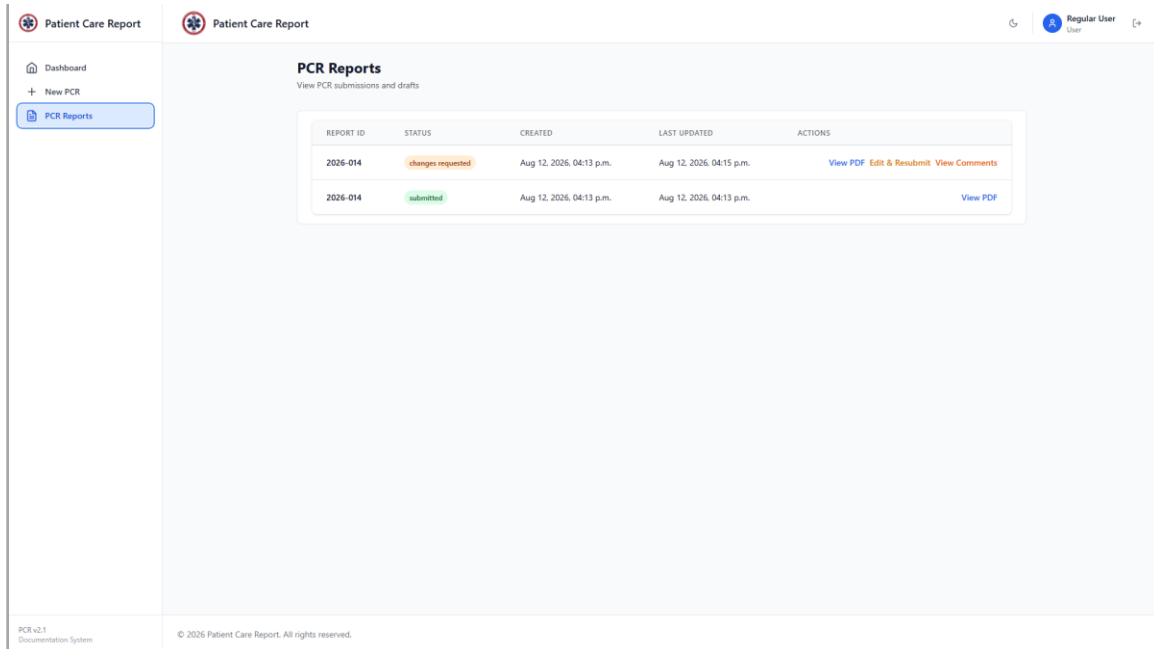

Figure 32. A report marked *Changes Requested*, now with a *View Comments* action alongside *View PDF* and *Edit & Resubmit*.

1. Click **View Comments** to see exactly what the admin asked you to fix.

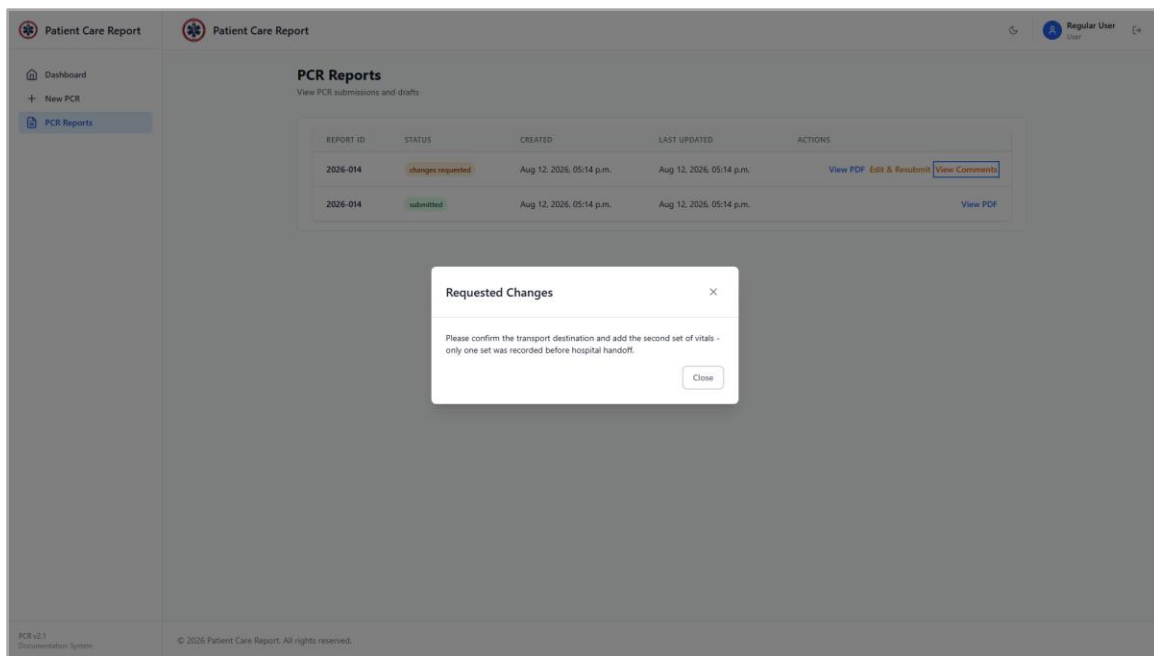

Figure 33. The admin's comments, shown in a read-only window.

2. Click **Close**, then click **Edit & Resubmit**.
3. The form reopens with everything you originally entered, plus a banner at the top repeating the admin's comments so you don't have to keep the other window open.

Figure 34. The form reopened for editing, with the admin's comments shown at the top.

4. Make the changes the admin asked for.
5. Click **Submit PCR** and go through the same preview-then-submit confirmation described in Section 9.

Time	HR	RR	SpO2	B/P	LOC, GCS	Skin	Pupils	Actions
HH:MM	rate, rhythm, quality	rate, rhythm, quality	% 100%	SYS/DIA or SYS/MLP	A&O x(1-3) or GCS 3-15	XX°C, color, temp, moisture	PERILAT X mm	
19:47	82, regular, strong	16, regular, unlaboured	98	118/76	A&O x4	Warm, dry, normal colour	Click to edit	
19:52	78, regular, strong	16, regular, unlaboured	98	116/74	A&O x4	Warm, dry, normal colour	Click to edit	

Figure 35. Reviewing the Vital Signs section while addressing the admin's feedback.

6. Once you confirm, the report goes back to **submitted** status, the admin's comments are cleared, and it's back in the review queue.

The screenshot displays the 'Patient Care Report' application interface. On the left is a sidebar with navigation links: 'Dashboard', '+ New PCR', and 'PCR Reports' (highlighted). The main content area is titled 'PCR Reports' with the subtitle 'View PCR submissions and drafts'. A table lists two reports, both with the status 'submitted'. A green notification banner at the top right states 'Report updated successfully'. The footer includes 'PCR v2.1 Documentation System' and '© 2026 Patient Care Report. All rights reserved.'

REPORT ID	STATUS	CREATED	LAST UPDATED	ACTIONS
2026-014	submitted	Aug 12, 2026, 04:13 p.m.	Aug 12, 2026, 04:15 p.m.	View PDF
2026-014	submitted	Aug 12, 2026, 04:13 p.m.	Aug 12, 2026, 04:13 p.m.	View PDF

Figure 36. The report back to Submitted status after resubmission.

NOTE Only you, as the report's owner, can edit a report while it's in **Changes Requested** status. Once you resubmit it, it locks again just like any other submitted report.

13. Deleting a Draft

Click **Delete** on any draft's row in **PCR Reports** to remove it. You'll get a confirmation popup first, click **OK** to confirm or **Cancel** to back out.

NOTE *Delete only ever appears on drafts, and it's the only way a PCR is ever removed by hand. Once you submit a report, deleting isn't available to anyone, including admins. The only ways a submitted report leaves the system afterward are if an admin cancels it or completes it, each of which schedules it for automatic removal about a week later.*

*Deleting is **permanent**. There's **no undo**.*

14. Logging Out

Click the **logout icon** in the top-right corner, next to your name, at any time. You'll be returned to the login screen.

Please ensure to log out before closing the application!

15. Quick Reference

Common questions, answered briefly:

- **Why can't I see my approved report anymore?:** Approved reports are removed from your list on purpose. Contact an admin if you need a copy.
- **Why can't I edit a report I already submitted?:** Submitted reports are locked until an admin either approves them or sends them back with Changes Requested. You can't edit a report that's actively awaiting review.
- **I was signed out while filling out a form — did I lose my work?:** Save Draft regularly if you're going to step away. A session timeout does not auto-save your progress.
- **Can I submit more than one report?:** Yes, there's no limit. Each one gets its own report number and moves through review independently.
- **What's the difference between Edit and Edit & Resubmit?:** They're the same action under different names. Edit & Resubmit only appears when a report is in Changes Requested status, as a reminder that you need to send it back once you're done.
- **What does it mean if my report shows Cancelled?:** An admin decided it wasn't needed after all (perhaps it was a duplicate of an existing report or the call did not warrant a PCR); nothing for you to do. You can still view the PDF, but it will be permanently removed automatically about a week later.
